

**REMARKS**

Claims 1-81, all the pending claims, are subject to a restriction requirement. Claim 67 has been amended. New claim 82 has been added. Support for new claim 82 can be found throughout the application as filed. No new matter has been added.

The Examiner required Applicants to elect one of thirteen patentably distinct inventions for examination. The Office Action alleges that each of the inventions is distinct because, *inter alia*, "they have no common utility which is based on a shared structural feature lacking from the prior art and disclosed as a basis for that common utility." (Office Action at page 4).

Applicants provisionally elect herein Group I encompassing claims 1-21, 25-29, and 72, "drawn to an isolated nucleic acid molecule encoding a polypeptide, and a method of use, classified in class 435, subclass 69.1".

Notwithstanding the foregoing, Applicants respectfully submit that no serious burden would be imposed upon the Examiner by combining several of the groups.

Applicants reserve the right to prosecute the claims encompassed by any of the non-elected groups in future divisional applications.

**Objections**

Claims 30-39, 44, 47, 52, 67, and 68 were objected to under 37 CFR 1.75(c) for failing to further limit the subject matter of a previous claim and also alleges that claims 44, 47, 52, 67, and 68 are "not product-by process claims because the processes referred to therein are analytical, not synthetic." Preliminarily, Applicants note that objected claims 30-39, 44, 47, 52 do not fall in the group elected by Applicants, Group I, and, therefore, are withdrawn from consideration. Claim 67 has been amended to depend from new claim 82. Applicants note that new claim 82 includes a synthetic step. Claim 68 depends from claim 67.

**Change of Correspondence Address**
